

Hospital Discharge Rate for Lower Extremity Amputations per 1000 People with Diabetes, 1998

Counties with the highest discharge rate

- Cleveland
- Jackson
- Lawrence
- Hot Spring
- Grant

Data from border counties may be underreported due to the unavailability of data from out-of-state discharges.

Data may represent multiple discharges per person. These rates should be interpreted as representing the number of hospital discharges, not the number of people with these complications.

Data represents the adult population over age 18.
