

Pre- Exposure Prophylaxis (PrEP) Services

IS PREP RIGHT FOR YOU?

Source: Center for Disease Control (CDC)
<https://www.cdc.gov/hiv/clinicians/prevention/prep.html>

What is PrEP?

PrEP (pre-exposure prophylaxis) can reduce your chance of getting HIV from sex or injection drug use. When taken as prescribed, PrEP is highly effective for preventing HIV.

Is PrEP Effective?

- PrEP reduces the risk of getting HIV from sex by about 99% when taken as prescribed.
- PrEP is less effective when not taken as prescribed.

Is PrEP right for YOU?

PrEP can help protect you if you don't have HIV and any of the following apply to you:

- You have had **anal or vaginal sex in the past 6 months** and you.
- have a sexual partner with HIV
- have not consistently used a condom, or
- have been diagnosed with a sexually transmitted disease in the past 6 months.
